

REMARKS

Applicant expresses appreciation to the Examiner for participating in the Interview in which the claims were discussed in view of the cited art. Based on the Interview, Applicant has amended the claims and finds that none of the cited references teaches, e.g.:

a case with one open face through which terminals extend when the transformer is assembled; and

areas, which are partially removed, on faces located at borders of the open face, the areas extending to the open face, with tape attached around an outside of the case to cover the removed areas, such that a resin fillable volume of the transformer, around the transformer body and within the case, is increased when assembled.

Based on the amendments, Applicant respectfully requests a notice of allowance.

Respectfully submitted,
Day Pitney, LLP
